AGRO LAND

FOR AGRICULTURAL MANUFACTURING S.A.E.

YOUR FRESH TRADING PARTNER IN EGYPT

About Us

It gave us a great pleasure to introduce our Co. Agro Land for Agricultural Manufacturing being part of EL-Naggar Group & specialized in growing, producing & exporting of Oranges, Lemons, Potatoes & Onions.

Mission:

Providing a healthy & vitamins enriched fresh produce to our selected long term loyal customers.

Vision:

Being one of the Middle East top vertically integrated Suppliers of Fresh Produce to our world wide 1st class designated customers.

Values:

We value long term business relation ship strategies with our clients which includes Commitment, Integrity, Health Care, Hygiene, Consistent high quality, On Time Delivery & on going customer support programs.

Navel Oranges

A Navel Orange is a special type of orange which has a little surprise inside once it is peeled: a partially formed undeveloped fruit like a conjoined twin, located at the blossom end of the fruit. From the outside, the blossom end is reminiscent of a human navel, leading to the common name of "Navel Orange". This particular variety of orange is juicy & sweet, with minimum to no seeds.

Nutrition facts:

Orange is loaded with the things that your body needs to stay strong day in and day out. Adults who include 8 ounces of orange juice in their diet everyday increase their intake of vitamin C, thiamin, potassium and other important nutrients. Parents who serve 100% orange juice to their children supply them with the nutrients needed to stay healthy.

Just look at all of the vitamins and nutrients that drinking a glass of 100% pure Valencia orange juice gives you.

Vitamin C, Folate, Potassium, Calcium, Thiamin, Niacin, Vitamin B6, Magnesium, Phytonutrients.

Sizes:

Oranges are sized according to the approximate number of oranges per carton which is:

48-56-64-72-80-88-100-113-125.

Season:

December till March

Valencia Oranges

Valencia Oranges is the most widely planted orange variety in the world. It originated in either Spain or Portugal. It was introduced to Florida in 1870 where it has gained commercial popularity. Valencia fruit are medium large, commercially seedless, with a thin peel. Aesthetically pleasing & full of sweet juices, The Valencia Orange has set the standards to which other round oranges use as comparison.

Orange Health Benefits:

- Reduce the risk of Cancer.
- Improve blood circulation.
- Lower the chances of birth defects.
- Promote the health of bone & teeth.
- Prevent kidney stones.
- Protect against respiratory health & rheumatoid arthritis.

Sizes:

Oranges are sized according to the approximate number of oranges per carton which is: 48-56-64-72-80-88-100-113-125.

Season:

March till May.

Farms & Growing Areas

Our Lands have been carefully selected in the finest agricultural spots in Egypt, where the soil's nature & the composition of minerals yield the finest sorts of about 50,000 MT of Oranges/ crop year.

The Packing Station Facility

We produce along our 5 stations about 500 MT of Oranges/ Day which are packed most probably in a 15 KG Net Telescopic or Open Top Cartons to be shipped on pallets using HC 40 feet reefer containers which loads from 20 - 24 MT depending on the used type of Cartons.

Adalia Lemon

The exact origin of the Lemon has remained a mystery, though it is widely presumed that Lemons are widely grown in both India & China. It is also speculated that Lemons were first grown on Mediterranean bushes, It was used as antidote for various poisons. The Lemon was later introduced to Egypt around 700 A.D. The popular drink Lemonade may have originated in medieval Egypt. It was distributed widely throughout the Arab world & Mediterranean.

Sizes:

Lemons are sized according to the approximate number of Lemons per carton which is:
80-88-100-105-113-125-138-165.

Season:

March Till May.

Potatoes

We specialize in growing Spunta, Nicola, Safrane, Mondial and Alaska sorts of potatoes. Our yearly production capacity is around 30 thousand tons.

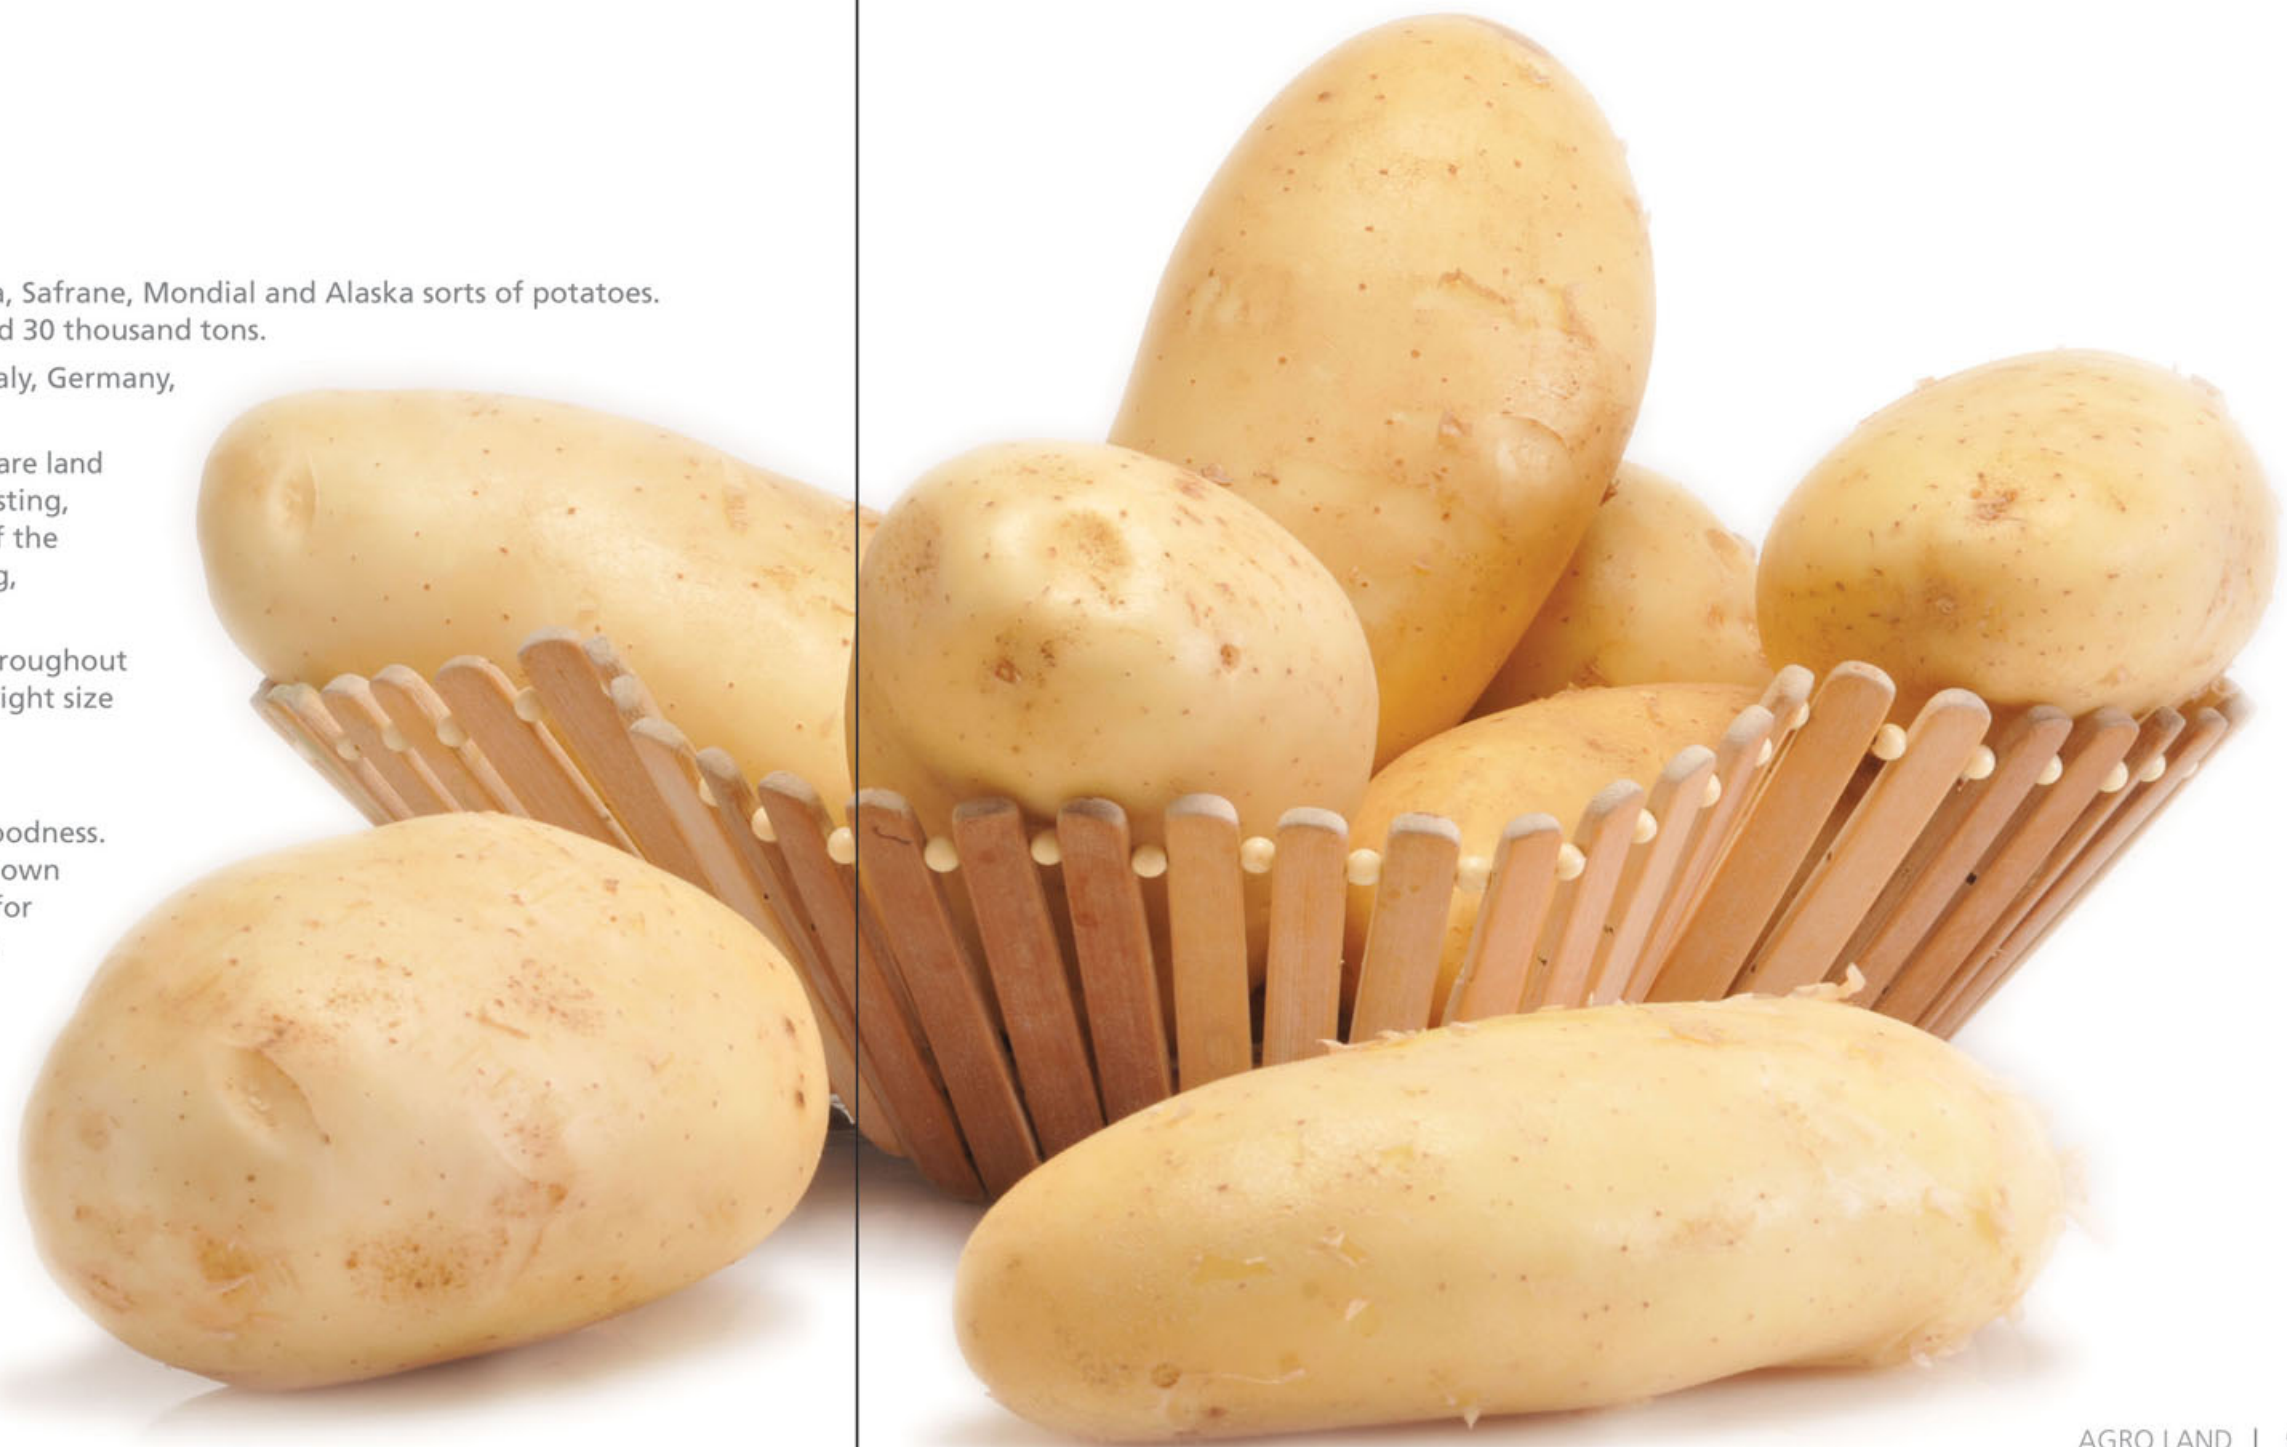

Our main export markets are Greece, Italy, Germany, Lebanon, Emirates and Saudi Arabia.

Because we are vertically integrated, we are land owners, growers, we do our own harvesting, weighing, quality control at the dock of the station, cleaning, brushing, drying, sizing, sorting and packaging.

We have three quality control stages throughout the process to insure flawless product, right size and right packaging.

Nutrition facts:

You bet! The potato is packed full of goodness. You'll probably know them as a well-known and excellent source of low fat energy for your brain and body. What most people don't realise is that they also provide substantial proportions of a whole range of important nutrients: Fibre, Vitamin C, potassium, Vitamin B1, B6, Niacin and Folate. Try this for size: a large jacket potato gives you more than half of the daily-recommended child requirement of Vitamin C.

**Farms
& Growing
& Areas**

Exclusivity & Uniqueness

We are the sole Importer of Exclusive Potatoe seeds varieties from the well known firm **GOPEX DISTRIBUTION S.A.** such as Safrane & Alaska that are grown in Brittany, France which was the 1st area in France to grow potatoe seeds then in 1766 it spread throughout France.
